

# RoPACS meeting in Lisbon

**Wednesday 8<sup>th</sup> September 2010**  
**University of Lisbon**  
**In parallel with the JeNAM 2010 meeting**

**(NB: RoPACS dinner is on the evening of Monday 6<sup>th</sup> September)**

<b>11:00 – 12:00</b>	<b>RoPACS management meeting (partner institute leaders attending)</b>
<b>14:00</b>	<b>Science presentations start</b>
14:00 – 14:05	David Pinfield Welcome (5 mins)
14:05 – 14:20	Paul Steele Introduction (13+2 mins)
14:20 – 14:35	Dimitris Mislis Increasing the accuracy of IR light curves – close to habitability (13+2 mins)
14:35 – 14:50	Gabor Kovacs Overview of the WTS data (13+2 mins)
14:50 – 15:05	Brigitta Sipocz Status update of the WTS candidates (13+2 mins)
15:05 – 15:20	Felipe Murgas The search of transits and WTS follow up at the IAC (13+2 mins)
15:20 – 15:35	Jesus Zendejas Latest report for WTS release 1 and final results for the improvements on difference imaging analysis (13+2 mins)
<b>15:35 - 16:00</b>	<b>Coffee (25 mins)</b>

16:00 – 16:15	Patricia Cruz Spectroscopic observations of WTS planet-host candidates (13+2 mins)
16:15 – 16:30	Michele Cappetta First radial velocity curves of four G, K and M dwarfs (13+2 mins)
16:30 – 16:45	Niall Goulding M dwarf variability and transits in the near infrared (13+2 mins)
16:45 – 17:00	Hannu Parviainen Transit fitting: Why, when and where to super-sample the transit model (13+2 mins)
17:00 – 17:15	Hristo Stoev "Characterisation and classification of variable stars in the WTS database" (13+2 mins)
17:15 – 17:30	Max Kuznetsov "Spectral investigations of CM Dra" (13+2 mins)
17:30 – 17:45	James Frith Preparing for Cosmic Vision (13+2 mins)
17:45 – 18:00	Joana Gomes Degenerate companions and extra-solar planets (13+2 mins)
<b>18:00</b>	<b>Finish</b>
